Highland City

## Mayor's Message - Kurt Ostler

Spring has truly sprung, and as I drive through our neighborhoods, I'm reminded of the strong spirit that makes Highland so special. I'm writing today to share some important news about our pressurized irrigation (PI) system — and to invite you to join us on the journey as we transition to water meters.

Since July 2023, we've been installing meters across the city to comply with the 2019 Utah law requiring all secondary water usage to be metered. Change can be overwhelming, but thanks to \$7 million in state and federal grants — along with \$3 million from our City PI reserves — most meters have now been installed.

If you experience any issues with your PI meter, please call the City, as our warranty work expires on July 15, 2025. For the 2025 outdoor watering season, we are not anticipating any rate increases.

Throughout this year's 2025 PI watering season, we'll be collecting usage data. Early next year, City staff will review that information to define what "reasonable usage" looks like for Highland homes. The staff will then present a thoughtful, tiered rate plan at a public City Council meeting — and your feedback will help shape that proposal. Our goal is to keep the process clear, fair, and transparent. I expect the tiered rate plan will be similar to our culinary water rate, with a base rate and higher fees for increased PI usage.

To help determine your PI usage for 2025, you can log into the Highland Water Portal at [highlandpimeters.com](https://highlandpimeters.com) to view daily and hourly water use, set high-use alerts, and download usage reports to plan your irrigation schedule. Unfortunately, due to the current software programming, the initial account setup process can be difficult. If you need help during the process, please visit [highlandpimeters.com](https://highlandpimeters.com) for step-by-step instructions or call 801-772-4515 and we can walk you through the process.

Have you ever wondered if you're watering just the right amount? We suggest the following monthly irrigation volumes for a lot where approximately half the area is irrigated:

0.25 Acres – 32,000 Gallons	0.33 Acres – 42,500 Gallons
0.50 Acres – 65,000 Gallons	0.75 Acres – 97,000 Gallons
1.0 Acres – 129,000 Gallons	

Use your PI portal data to compare your consumption and plan efficient watering.

Thank you for joining me in caring for Highland's most precious resource — water. Through these small, collective steps, we can ensure a bright, sustainable future for our families and neighbors here in Highland. If you have questions about PI water meters or usage, please email [pimeters@highlandut.gov](mailto:pimeters@highlandut.gov) or call 801-772-4515.

**Highland Historical Society** We're celebrating 150 years of families in Highland! Our community is rich with history, talent, and a desire for connection. Families have carefully preserved and donated fascinating pieces of our past — classic vehicles, antique machinery and furniture, letters, documents, and more. There's also growing interest in having more local opportunities to learn new skills — from fine & media arts, music, and dance to writing, genealogy, and historical crafts — and more chances to enjoy local performances and seminars.

The Highland Historical Society and Highland Arts Council would like to work with you to make these things happen here in Highland! **How can we best achieve these goals within our community?** Please share your creative ideas on how our community might:

1. **Better protect and publicly share** the historical artifacts.
2. **Increase local opportunities** for classes and activities for children to seniors.
3. **Create more possibilities** for seminars and musical and theatrical performances.

Exploring these ideas will take some coordination. Would you be willing to offer **small acts of service** — perhaps an hour of your time for tasks like researching a specific topic, making a few phone calls, or organizing — as we follow up on the ideas received?
